

AMENDMENTS TO THE SPECIFICATION

Please replace numbered paragraph no. 58 with the following amended paragraph:

A data structure of an address system using the IPv6 address according to the present invention can also be embodied on computer readable recording media or other transmission media. The computer readable recording media include all types of recording devices in which data that can be read by a computer system are stored, such as ROMs, RAMs, CD-ROMs, magnetic tapes, floppy discs, and optical data storage units. Other transmission media can include carrier waves (for example, transmission via the Internet). Also, the computer readable recording media are distributed over a network-connected computer system and can be stored and executed by computer readable codes.
